Dear Participant,

Welcome to a wonderful 2019 lesson year! Please review the enclosed information and policies. If you have any questions, please ask.

Enrollment: Participants can enroll in any number of sessions during the year. Lesson time may include grooming and tacking. Once the paperwork is completed, new riders may be asked to come to Heritage Christian Stables for an evaluation to determine acceptance into the program. Riders are scheduled in compatible groups according to the lesson schedule. If Heritage Christian Stables is unable to accommodate a rider that has been evaluated and accepted into the program, the rider will be placed on a waiting list until an appropriate time slot becomes available. Riders will be accommodated according to compatibility, time availability, and horse usage.

Cost: Lessons cost \$40.00 and are approximately one hour in length with three or more riders, 45 minutes with two riders, one half hour with one rider. The session fee is payable *in advance* of the start of the session. If a rider needs financial assistance, ask Lorrie about availability. Your lesson fee covers 30% of the actual cost of rider participation. **The remaining 70% is subsidized through fundraising, grants, sponsorships, individual donations etc.** Heritage Christian Services encourages your participation in helping to offset the difference in cost through participation in fundraising events. Ask for more information.

** Please review updated weight procedure on the Information page near the end of the packet. **

Attendance Policy: If Heritage Christian Stables cancels lessons, a makeup or credit will be given for the lesson. If a rider cancels, no makeup will be provided. Policy allows one pre-arranged (prior to start of lessons) credit per session. Lateness (15 minutes or more) is considered a cancellation. Any requests for exceptions to this attendance policy must be made at the time of enrollment into the session. Riders *must be accompanied* by guardian/staff while at the stables.

Clothing: Riders must wear long pants. Hard soled shoes with heels are preferred. Heritage Christian Stables has riding helmets available. Rider owned helmets are encouraged and must be ASTM-SEI approved for horseback riding and fit properly. Riders are to have no objects in their mouth as they can pose a choking hazard (ie: gum, hard candy, etc).

Forms: All forms must be completed prior to participation and are updated annually. Please keep any information pages for future reference.

Physical Address: Heritage Christian Stables is located at 1103 Salt Road, Webster, NY 14580.

Mailing Address: Heritage Christian Stables, PO Box 200, Webster, NY 14580

Liability Release and Photo Release Form

Liability Release

I/ my child would like to participate in the therapeutic horseback riding program at Heritage Christian Stables. I acknowledge the risks and potential for risks of engaging in horseback riding activities as well as activities in the close proximity to horses, however, I feel that the possible benefits to me/my child are greater than the risks assumed. I hereby, intending to be legally bound, my heirs and assigns, executors and/or administrators, waive and release forever all claims for damages against Heritage Christian Stables, a program of Heritage Christian Services, its instructors, volunteers, and/or employees for all injuries and/or losses that I/my child may sustain while participating in activities at Heritage Christian Stables.

Information Concerning the Therapeutic Horsemanship Program

Therapeutic Horsemanship describes equine activities organized and taught by knowledgeable and skilled instructors to people with disabilities or diverse needs. Students progress in equestrian skills while improving their cognitive, physical, emotional, social, and behavioral skills.

What are the Benefits: Physically, therapeutic riding can improve coordination and help normalize muscle tone. It can help improve posture and increase the functional range of motion, muscular strength, and flexibility. Perceptual and sensory motor skills may also improve. Psychological benefits include improved motivation, self-esteem and confidence. Therapeutic riding enhances the development of cognitive skills and allows the participant to improve socialization skills and learn team work.

How do you qualify to participate in the therapeutic horsemanship program?

- Riders over the age of four
- Meets the current horse weight requirements (200 pounds for balanced riders) Rider weight is determined at the start of each session and HC Stables reserves the right to weigh participants to determine accurate horse usage.
- Riders have appropriate behavior to maintain safety

The following conditions ARE contraindicated for therapeutic riding:

- Structural scoliosis greater than 30 degrees
- Uncontrolled seizures
- Evidence for Atlantoaxial Instability (see additional information)
- Tethered Cord or Chiari II Malformation
- Indwelling catheter
- Spinal Cord Injury above a T-6
- Hemophilia

The following conditions MAY BE contraindicated:

- Hip subluxation, dislocation, or degeneration
- Osteoporosis
- Osteogenesis Imperfecta, lordosis, or kyphosis
- Recent surgeries
- Recurrent pathological fractures
- Spina Bifida
- Spinal fusions / spinal instability / spinal stabilization devices
- Varicose veins
- Diabetes

Heritage Christian Stables may be unable to accommodate a potential rider due to resources available and program capabilities (ie: horses, equipment, instructors, volunteers and capabilities). Riders accepted into the program are re-evaluated on a regular basis and may become ineligible. The therapeutic riding program follows PATH's Precautions and Contraindications Guidelines.

If you have a question as to whether you qualify for the Therapeutic Horsemanship Program, contact: Heritage Christian Stables at 585-872-2540 or www.heritagechristianservices.org.

Information Concerning Participants with Down Syndrome and Atlantoaxial Instability

Atlantoaxial Instability (AAI) in Down Syndrome

Atlantoaxial instability (AAI) has been described as instability, subluxation or dislocation of the joint between the first and second cervical vertebrae (atlantoaxial joint). Instability of the joint is generally due to poor muscle tone and ligament laxity that is common with **Down syndrome**, less common with other disorders. The problems that may arise with a lax joint is that there can begin to be pressure on the spinal cord, resulting in neurologic changes (see listing below). This is symptomatic AAI and will always require evaluation by an MD and restriction of high-risk activities such as riding or driving. This is a potentially paralyzing or life-threatening condition. Incidence of non-symptomatic AAI among persons with Down syndrome is reported to be 10 to 20 percent. Symptomatic AAI is much less frequently seen. For the child from two to four years, please refer to the section on Age-Related Considerations, and always consult with the participant's pediatrician. A group of individuals with Down syndrome have been reported to demonstrate neurologic abnormalities with no visual AAI. The cause of these abnormal neurologic signs is unclear. **Neurologic signs always supercede radiographs and the presence of the neurologic disorder must be evaluated by a physician and is a contraindication for mounted equine activities.**

- Note that it is not just a fall that is a potential for injury. For a participant with low muscle tone and laxity in the joints of the neck, the repeated movement of the equine or a sudden quick movement of the equine as with a spook or a misstep could be enough to cause problems. Please also see the section on Head/Neck Control.

Professional Association of Therapeutic Horsemanship International requires that all participants with Down syndrome have:

Prior to starting mounted activities:

- A. A yearly medical examination including a complete neurologic exam that shows no evidence of AAI.
- B. Certification by a physician that an examination did not reveal atlantoaxial instability or focal neurologic disorder.

Atlantoaxial Instability/Neurologic Symptoms

- Change of head control
 - Torticollis/wry neck
 - Head tilt
 - Stiff neck
- Change in gait
 - Progressive clumsiness
 - Toe walking or scissoring
 - Falling
 - Posturing
- * Change of hand control
 - Progressive weakness
 - Fisting
 - Change of dominant hand
 - Increasing tremor
- * Change of bladder function
- * Change of bowel function

Precaution:

- Monitor for neurologic symptoms. Report changes to the family/physician and discontinue until cleared by the physician.

Contraindication:

- Children under the age of two
- Neurologic symptoms of atlantoaxial instability (see listing above)
- Positive neurologic clinical signs as noted by the physician
- Significant AAI measurement as determined by the physician
- Excessive head/neck instability with or without a helmet
